The collage consists of four photographs documenting the 2020 year-end summary event. The top-left photo shows a modern reception area with a curved desk, staff members, and the company logo 'Dongguan Huifanmax Electric Appliance Co., Ltd.' The top-right photo shows a large group of staff members in red shirts standing behind a long table filled with trophies. The bottom-left photo shows a group of staff members in red shirts standing in front of a banner that reads '2020年年终总结表彰大会' and '同心协力 永创佳绩'. The bottom-right photo shows a group of staff members on a stage, giving thumbs up, with trophies in the foreground and a large banner in the background.

A horizontal timeline with a blue line and circular markers. Above the line, dates and event names are listed in blue text. Below the line, circular images show the company's presence at each event. The events are as follows:

Date	Event Name
2015.04	117th Canton fair
2016.04	119th Canton fair
2017.04	121st Canton fair
2017.12	Hotelex in Guangzhou
2018.04	124th Canton fair
2018.12	Hotelex in Guangzhou
2019.03	Hotelex in Shanghai
2019.04	125th Canton fair
2019.12	Hotelex in Guangzhou
2020.04	Live Canton fair
2021.01	SKA Alibaba

Intelligent Cooking Machines

智能炒菜机系列

Intelligent Cooking Machines **Series**

智能炒菜机系列

Building the Kitchen for Tomorrow

Primary gold-Enabling kitchens to maintain consistency and quality of the end product while driving down costs by reducing dependence on skilled manpower.

Cost reduction-Human resource costs wastage

Increased Revenue generation- Standardizing consistency and satisfaction improves. Increase consumption and ROI.

Hot selling counter top model

Intelligent IOT

智能物联 在线掌控全局

The intelligent kitchen management system collects big data of equipment operation in real time, conducts comprehensive analysis and management of equipment energy consumption status, operating status, maintenance status and electronic recipe application status, and reduces operating losses caused by equipment failure.

All-round remote analysis and management eliminates the need for a huge management team to manage each store, effectively saving operating costs.

智能后厨管理系统实时采集设备运营大数据，对设备能耗状态，运行状态，维护状态及电子菜谱应用状态进行全方位的分析和管理，减免因设备故障而造成的运营损失。全方位远程分析与管理，不再需要庞大的管理团队来管理每一个门店，有效节约运营成本。

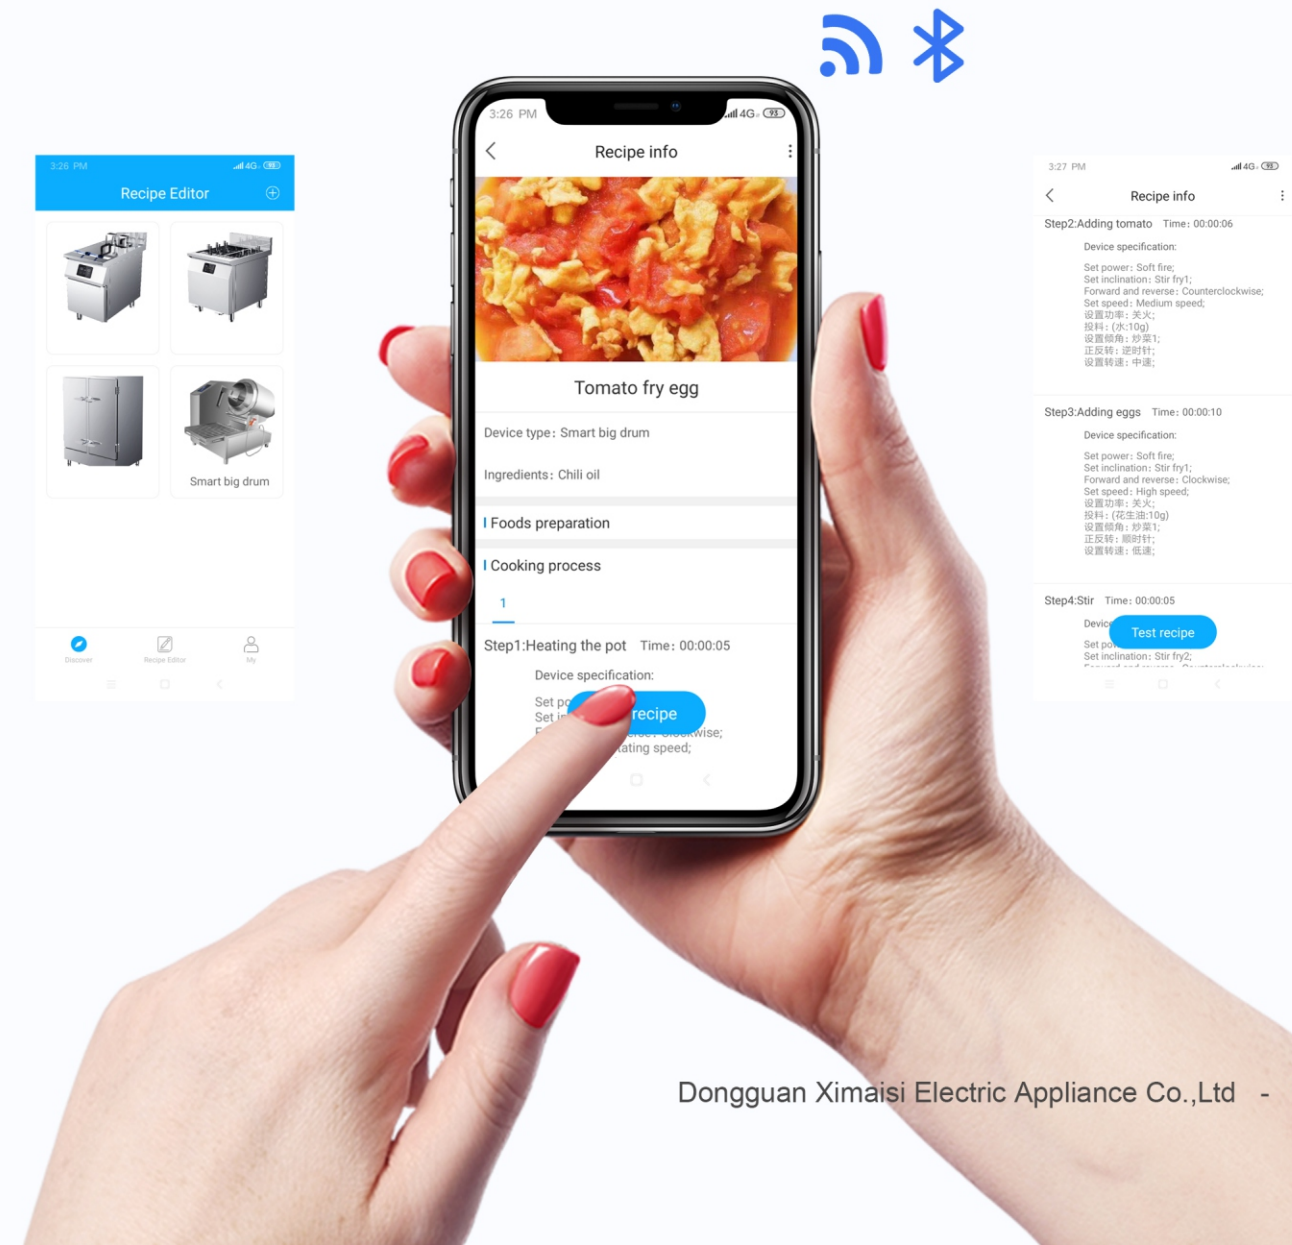

App Controls Everything

随时随地一手掌握 三大APP 开启智能物联新时代

Standardized recipes realize overall intelligent control, automatic temperature and time control, and simple operation can cook delicious dishes from the five-star chef skills.

Mobile phone editing recipes, one-key cooking, simple operation, stable output of dishes, saving money and worry. One-click management of all equipment in the store, easy maintenance of daily routine operations, early grasp of equipment operation information, and protection of terminal operation.

标准化菜谱实现整体的智能操控，全自动温度及时间控制，简单操作就可以烹饪出五星厨师书平的美味佳肴。手机编辑菜谱，一键烹饪，操作简单，菜品品质输出稳定省钱即省心。一键管理门店所有的设备，轻松维护每日常规运营，提早掌握设备运行信息，为终端运行保驾护。

Advantages of Automatic Cooking Machines:

我们的核心竞争力:智能科技

Intelligent recipes

智能菜谱

Standardization of dishes: Standardized recipes realize overall intelligent control, automatic temperature and time control, and simple operations can cook delicious dishes with five-star chef level.

Kitchen management

后厨管理

The intelligent back kitchen management system collects big data of equipment operation in real time, conducts a full range of real-time analysis and management of equipment energy consumption status, operating status, maintenance status and electronic recipe application status, and reduces operating losses caused by equipment failure. The dedicated recipe

Intelligent control

智能控制

Intelligent automatic temperature control system, using mathematical algorithms to realize dynamic temperature control, with an accuracy of $\pm 1^{\circ}\text{C}$; automatic feeding system, automatic feeding of liquid materials in the eighth middle school; automatic cleaning of the same body, liberating kitchen labor; full text and voice prompts to ensure recipes the correct operation.

Structure

框架结构

Sturdy frame structure and full SUS304 stainless steel shell, beautiful and durable, smooth operation, low noise as low as 50 decibels; IPX4 waterproof level, perfect for high temperature and heat environment such as kitchen.

Electromagnetic efficiency

电磁效率

The alternating magnetic field is used to generate small eddy currents in the metal body, so that the pot itself quickly heats up on its own, avoiding indirect energy waste, fast heating speed, less heat loss, thermal efficiency up to 90% or more, and fuel gas increase by more than 30%. The power margin is sufficient, and the heating is fast during the period, which perfectly realizes the stir-frying function, retains the gas of the dish, and ensures the taste of the food.

High-quality movement

高质机芯

The self-designed highly reliable movement is adopted. All electronic components adopt domestic first-line and imported guarantees. In the temperature range of -30°C to 50°C , stable output of sufficient power can be achieved for a long time. After multiple safety and reliability tests, it is guaranteed high-quality and stable operation of equipment.

Security

安全防护

Multiple safety protection equipment, central system control to ensure safe and stable operation
